DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 4 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by Kaneko et al. (6,747,946).

Kaneko et al disclose in figure 11 a method for effectively pruning a FFT circuit by forcing the input signals (X[2]-X[4], X[6]-X[8], X[10]-X[12], and X[14]-X[8]) of predetermined butterfly modules to be pruned to zero (ground) as claimed (see also figure 14).

3. Claims 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 1-3 are allowed.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
